

SAFEWAZE

DISCOVER FALL PROTECTION'S MOST RESPONSIVE PARTNER

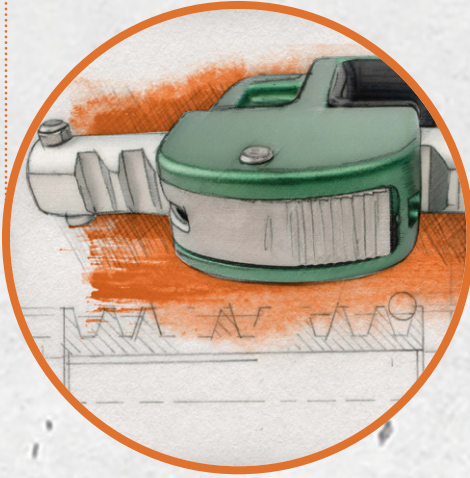

TO BE RESPONSIVE, FIRST WE LISTEN.

Our customers won't settle for a one-size fits all approach – we constantly innovate to provide quick and flexible fall protection solutions.

◦ Anchors

Anchors are the foundation of fall protection. From the mobile convenience of a strap anchor to the cast-in-place security of a concrete post anchor, we have the support you need.

Harnesses ◦

Your harness needs to provide all-day comfort plus keep you safe in a fall. Our line includes a variety of options to provide a perfect fit for both you and the job at hand.

Lanyards ◦

We carry more than a dozen lanyard categories. From cable and web to internal and external energy absorbers, our experts can help you select just the right one to keep moving safe onsite.

PROUDLY SERVING

the builders and workers who get the job done in the construction, industrial, solar, wind, tower, energy and general safety markets with more than 1200 individual SKUs – and counting.

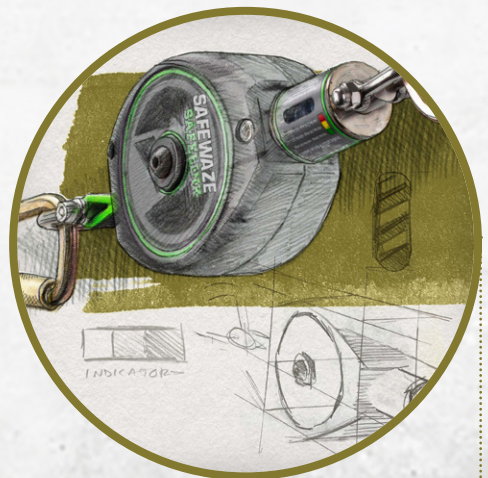

◦ SRLs

You can have it all: mobility, durability and dependability. From lightweight or heavy duty to leading edge or arc flash, our SRLs are proven to go the distance.

◦ Vertical Lifelines

The hands-free, continuous movement of our VLLs keeps you working. Whether climbing a ladder or performing maintenance, our systems offer easy installation and use while maintaining a secure overhead connection.

Horizontal Lifelines ◦

Get the full range of motion you need with our range of horizontal lifeline systems. Ideal for leading edge and low clearance conditions as well as roofing environments. Easy installation and hands-free use for multiple users.

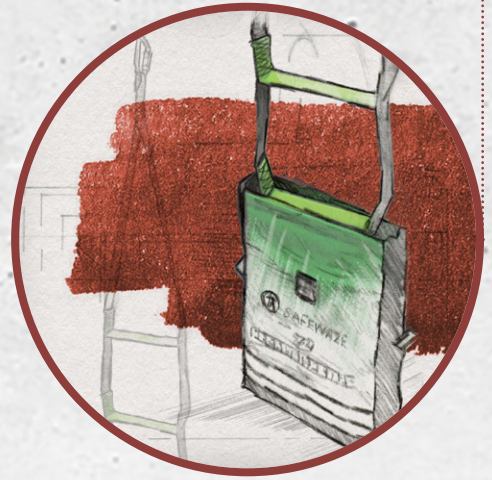

Ladder System

Take the next step in ladder safety with our flexible cable systems. Easy to install with options to ensure safe rooftop transitions, access for multiple users or custom build your system.

Confined Space

Designed to get you in easily and out safely. Our confined space program supports entry and exit from manholes, silos, wells, sewers, pits, pipelines and tunnels— all while working comfortably in between.

Rescue

Every second counts in an emergency rescue situation. Preparation is key, so our experts will help you select the right equipment to have on hand, ready exactly when you need it.

“Safewaze is a **beacon of light** in a dark landscape of manufacturing. It’s nice to know there are companies out there still hustling to be **responsive**.”

Inventory manager,
construction equipment

Tool Lanyards

The force of a dropped object can cause severe injury or death. Falling objects are easily preventable with specific equipment designed for comfort and practical use in the field.

Kits & Combos

For utmost convenience and added value, these collections are grouped to meet your specific needs. All the basic necessities are packaged together to ensure each worker is properly protected.

Accessories

In fall protection, accessories are not just for decoration. They are an integral part of the safety system, making the product more efficient or versatile. Bonus, ours look good while doing it.

TRAINING

We recognize education as a critical investment in our mission to protect workers at height. We provide general training as well as comprehensive product training where you need it, when you need it.

At your location or ours, online or off-site, for groups from 5 to 500. Invest in education with courses from Fall Protection Basics and Equipment Inspection to Competent Person and Rescue Planning.

ABOUT US

Since 1994, Safewaze has been on a mission to protect workers at height. As fall protection's most responsive partner, we provide solutions for fall prevention, fall arrest, rescue and confined space. With a 100,000 sq. ft. facility in North Carolina, our team relentlessly pursues our vision to be the best. From anchors and harnesses to rescue and railings, we deliver exactly what you need, when you need it.

SERVICE & REPAIR

Protecting lives and livelihoods means keeping your equipment in action and on the jobsite. We offer certified service and repair on select items including rescue devices, confined space equipment and SRLs. Save money, minimize downtime, extend product life and maintain the highest levels of continued safety.
